

# Congregation Website Self- Evaluation

Developed by Bob Fisher, SEPA Synod ELCA

Websites are living things, and they need to grow and change to remain vital. It is good to periodically review your site for its content, its design, and its ease of use to see how a visitor might experience it, and then make updates or additions as needed.

To evaluate your site, first take an overall look at the home page and main landing and subpages. You want to look for three characteristics: its overall visual impact (which I call “curb appeal”), how the site conveys the personality of your congregation, and how the site meets current standards of professionalism for websites (a moving target, at best).

“Curb appeal” – Is the appearance and organization of the site visually pleasing? Will a drive-by visitor be met with strong visuals or have to wade through a lot of text? Does the site feel current or futuristic rather than dated? Rate 1 (lowest) to 5 (highest).

Comments:

“Personality” – Does the casual visitor get a sense of who the congregation is, through story and/or pictures/video? Would a first-time visitor making a quick assessment sense that people have fun and are engaged in church? *Is this sense of personality accurate to what visitors will find?*

Rate 1 (lowest) to 5 (highest). 1 | 2 | 3 | 4 | 5

Comments:

“Professionalism” – How does the site look and function on a scale of 1 (amateurish) to 5 (very professional)?

Rate 1 (lowest) to 5 (highest). 1 | 2 | 3 | 4 | 5
